For a PowerMate D or F you press and hold the 7 and 9 buttons on the pendant while turning on the power. Then you have to reload all the parameters, programs, etc. Your PowerMate E might have a different process to initialize the memory. Look in your PowerMate maintenance manual under "List Of Operations DPL/MDI" for instructions on "All Memory ...

Hello Everybody, i have a problem with a Fanuc powermate model E It is connected to Fanuc 16i-MA Controller, but we've lost the powermate's parameters. We have another machine with the same parameters, we want to save those parameter into a Flash Card, and then load those parameter to the other powermate. Does Somebody have a procedure to do that?

~~Powermate Model E Problem - Practical Machinist~~

Now here is the tricky part: Parameters and Macro Variables are Two Different Things! I don't know why we like to call it "Parameterized Programming" and then immediately quit talking about Parameters, which have little to do with Parameterized Programming. It's tempting to think Parameters are just System Variables (more on what a System Variable is in a moment), but they're complet
