If this is your student's first exposure to a dichotomous key, ease them into it with a review of animal... Make it interesting... Exquisite ...

Dichotomous Key Worksheets and Activities - Sockmonkey Science

Use the dichotomous key to reach the names of each of the 12 animals AND the pathway you used to get there. This is about learning to use a key - not about knowing the names of these common animals (it is assumed you know their names). So use the blanks under the animal pictures to write the animal names AND the numbers in the key you follows to reach their names.

Learn How to Use a Dichotomous Key - Common Animals

This lesson goes through what a dichotomous key is and how students can analyse one using exam style question practice. This dichotomous key worksheet presents your students with six species and a page that includes part of the Dichotomous Key.

Taxonomy Dichotomous Key Activity (teacher made)

A dichotomous key is a method for determining the identity of something (like the name of a butterfly, a plant, a lichen, or a rock) by going through a series of choices that leads the user to the correct name of the item. Dichotomous means "divided in two parts". At each step of the process of using the key, the user is given two choices; each alternative leads to another question until the item is identified.

Make a Dichotomous Key: Enchanted Learning.com

This is a dichotomous key activity. A dichotomous key is a tool that scientists can use to help identify a particular specimen. The specimen could be a chemical that is identified by its physical properties or an insect identified by its markings and traits, based on its different properties. The term dichotomous begins with the prefix "
