What works best? Depends upon the engine and what works best for you. There are no one size fits all timing solutions. But a generally stock-headed FE will like around 38 degrees total timing. You generally don't have to worry too much about initial timing over 12 degrees.

#### *Ignition timing - 332-428 Ford FE Engine Forum*

2018-03-30T15:59. Just for the initial start, you'd look for 10-14 degrees initial. You shouldn't be concerned with total timing at this point. What the engine wants once you are ready for tuning really depends on a very long list of variables and no one can get you to the sweet spot over the distance of the Internet.

#### *Timing - 332-428 Ford FE Engine Forum*

I usually run anywhere between 14-18 initial depending on the combination. What's more important is how much advance you run and where it comes in at. The distributor starts advancing somewhat early anyway, so you never really stay at initial timing except at idle or just right above idle.

#### *390 Timing - 332-428 Ford FE Engine Forum*

The 3RZ FE engine has a timing chain, which drives the intake camshaft only. The intake camshaft rotates the exhaust camshaft by a scissors gear. Camshaft specifications: intake duration - 230 degrees; exhaust duration - 224 degrees. The engine has a hydraulic timing chain tensioner and oil jet to lubricate the chain.

The AZ series came to replace the Toyota S Series engines in 2000. The first in the displacement range is the 2.0-liter 1AZ-FE engine. Its predecessor is the 3S-FE. The engine includes many advanced technologies for that period. The 1AZ has aluminum cylinder block with cast iron liners. It features offset cylinder and crank centers.

In this year range, all Santa Fe cars with the Theta, Lambda and Hyundai R engine have a timing chain while cars with the 2.7L Mu engine and the older 2.2 CRDI have a belt. 2013 - 2017: In the third generation of Santa Fe, all cars with the 2.0L, 2.2L, 3.3L and 2.4L engines have a timing chain.

#### *Hyundai Santa Fe Timing Belt Or Chain ? (2001 – 2017 ...*

As far as a total timing curve, with that cam in a relatively small FE I'd shoot for 15 or so initial with 36 or so total timing in by 3000 for a heavy car, 2700 or so for a short geared lighter car (cant see your pics from out here in

The KL & FS ATX engines both require 10° BTDC ignition timing while the FS MTX & FP require 12° BTDC. The FP does not share the same G25M-R transmission as the FS. In the Protégé it uses a F25M-R instead.

*Mazda F engine - Wikipedia*

The Toyota E engine family is a straight-four piston engine series, and uses timing belts rather than chains. The E engines were the first multi-valve engines from Toyota designed with economy, practicality and everyday use in mind (rather than performance). Like many other Toyota engines from the era, the E engine series features a cast iron block, along with an aluminium cylinder head.
