The words internetwork and internet is simply a contraction of the phrase interconnected network.

However, when written with a capital "I," the Internet refers to the worldwide set of interconnected networks. Hence, the Internet is an internet, but the reverse does not apply. The Internet is sometimes called the connected internet.

# Where To Download Internet Protocol Manual

Exchange (IKE, sometimes IKEv1 or IKEv2, depending on version) is the protocol used to set up a security association (SA) in the IPsec protocol suite. IKE builds upon the Oakley protocol and ISAKMP. IKE uses X.509 certificates for authentication ? either pre-shared or distributed using DNS (preferably with DNSSEC) ? and a Diffie-Hellman key exchange to set up a ...
