Surface Preparation Standards Explained - SSPC/NACE & ISO 8501

ISO 8501, ISO 8502 and ISO 8503 do not contain recommendations for the protective systems to be applied to the steel surface. Neither do they contain recommendations for the preparation grades for specific situations even though surface quality can have a direct influence on the choice of protective coating to be applied and on its performance. Such recommendations are found in other documents ...

ISO 8501-4:2006 - INSPECTOR.PRO

ISO 8501 is meant to be a pictorial guide to different rust grades at various levels of cleanliness and contains supplementary descriptions via text as well. It ' s a method of making visual assessments on the rust grades of the cleanliness of steel surfaces and helps determine paint coats and systems to be used on the substrate.

[PDF] ISO 8501-3 2007 Preparation of Steel - Free Download PDF

ISO 8501-1 is a visual reference and does not explicitly state percentages. The specifications specifically mention stains, streaks and shadows, but they are practically the same: a difference in color but of no discernible thickness. Tightly adhered material refers to anything that cannot be peeled off with a dull putty knife.
