Critical Care Perspective The POOR Get POORer: A Hypothesis for the Pathogenesis of Ventilator-induced Lung Injury Donald P. Gaver III, Gary F. Nieman, Louis A. Gatto, Maurizio Cereda, Nader M. Habashi, and Jason H. T. Bates pp. 1081-1087

American Journal of Respiratory and Critical Care Medicine

The Adult Critical Care Specialty (ACCS) Examination objectively measures the knowledge and skills of respiratory therapists in this specialty area. It goes above and beyond general respiratory care activities to focus specifically on competencies that are unique to adult critical care. Therefore, wearing the RRT-ACCS badge of distinction signals to employers, colleagues and patients that your skills are highly specialized.

Adult Critical Care Specialty (ACCS) - The National Board

Pulmonary and critical care experts report that the enlargement of peripheral pulmonary vessels, vascular tree-in-bud patterns and perfusion defects observed in patients with severe COVID-19 are all manifestations of pulmonary thrombotic angiopathy, and may be useful markers of disease severity. Call for Papers: AJRCCM Asthma-Focused Special Issue

American Journal of Respiratory and Critical Care Medicine

a) The flow rate is too low. b) The flow rate is too high. c) The client shouldn't receive oxygen. d) The flow rate is correct. b) The flow rate is too high. The administration of oxygen at 1 to 2 L/minute by way of a nasal cannula is recommended for clients with COPD. therefore, a rate of 4 L/minute is too high.

Critical Care exam 1- respiratory Practice questions

If so, you're in the right place, because that is what this study guide is all about. As a Respiratory Therapist (or student), is it critically important to know and understand the ins and outs ABGs. With that said, it's a topic that many students struggle with — especially when it comes to ABG interpretation. If that's you, not to worry.

ABG Interpretation- The Ultimate Guide to Arterial Blood Gases

The AARC's Adult Critical Care Specialist course is a comprehensive course developed to enhance the critical skills necessary for respiratory therapists who work in the critical care environment. This is an excellent course to assist those respiratory therapists preparing to challenge the National Board for Respiratory Care (NBRC) Adult Critical Care Specialist examination.

Adult Critical Care Specialist Course - AARC

Introduction. This course presents several case studies. Each case presents patient history, test results and some vital signs. Auscultation skills are used as part of most of the cases as well as the assessment of the patient's blood pressure. These cases challenge each student ability to solve diagnostic and therapeutic issues based upon knowledge and patient assessment skills.
