Scheduling Of Railway Maintenance Activities

Abstract. An important aspect of infrastructure management is the scheduling of maintenance tasks, which implies the allocation of tasks to different crews or machines and the determination of an execution order. To this end, different aspects

Online Library Scheduling Of

Railway
have to be considered.

On the one hand, the
Infrastructure
Maintenance
Tasks
maintenance operator is
interested in reducing
direct maintenance
costs, e.g. travel costs.

Abstract. Before railway
track maintenance crews
can undertake any work,
the allocation of

Online Library Scheduling Of

activities to available
time intervals in the
train schedule as well as
to crews must be

undertaken. This paper
puts forward a model
aimed at determining
the best allocation of
maintenance activities
and crews so as to
minimise the disruption
to and from scheduled
trains and to reduce
completion time.
