**DESCRIPTION** Analyze the spectra of a variety of stars. Determine the elements that are represented in each spectrum, and use this information to infer the temperature and classification of the star. Look for unusual features such as redshifted stars, nebulae, and stars with large planets.

[Star Spectra Gizmo : ExploreLearning](#)

**Student Exploration: Star Spectra** The interior of a star produces a continuous spectrum of light, like a rainbow. Cooler gases in the outer layers of the star absorb certain wavelengths of light, causing dark lines to appear in the spectrum. The resulting absorption spectrum can tell astronomers a great deal about the star. **Activity: Classifying stars** Get the Gizmo ready: Check that Show ...
